**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Kelsey [Pat. No. 519,580].

Kelsey teaches a device comprising a frame with two opposing sidewalls coupled to a base member (Figure 1, b-c), a plurality of removable, perforated trays (Figure 1, g), and a handle (Figure 1, d). Phrases such as "for an automatic bread making machine" are merely intended methods of using the claimed apparatus and as such are not given patentable weight.

3. Claims 1-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Chadwick et al [Pat. No. 2,671,004].

Chadwick et al teaches a device comprising a frame with two opposing sidewalls coupled to a base member (Figure 1, #5 & 10), a plurality of removable, perforated trays (Figure 1, 25), a housing with a baking chamber which inherently included a heat source (Figure 1, 1), and a handle (Figure 2).

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 11-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Barradas [Pat. No. 5,445,061] in view of Kelsey.

Barradas teaches a device and method for making bread comprising a baking chamber (Figure 5, 12), a frame with a base member coupled to a bottom region of the baking chamber (Figure 5, #48, 54, 56), vertically spaced removable trays (Figure 4, #48; Figure 5, #58, 60, 62), a source of heat (column 2, line 45), a container for bread making ingredients (Figure 2, 24), a mixing motor (Figure 2, 14), and mixing the ingredients in the container to form a dough, dividing the dough into portions, and placing the portions into trays (column 2, lines 57-70). Barradas does not teach a frame with two sidewalls which hold removable trays. Kelsey teaches a cooking method and device comprising a frame with two opposing sidewalls coupled to a base member (Figure 1, b-c), a plurality of removable, perforated trays (Figure 1, g), and a handle (Figure 1, d). It would have been obvious to one of ordinary skill in the art to incorporate the rack assembly of Kelsey into the invention of Barradas since both are directed to cooking devices, since Barradas already includes a removable rack system with trays, since the rack structure of Kelsey was sized to fit within a pot (Figure 1) and the baking chamber of Barradas was sized to accept a pot-sized rack structure (Figure 1), and

since the rack structure of Kelsey would connect the trays into one unitary structure and permit one-step insertion and removal of the trays.

***Conclusion***

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
